OPERATIONS & SUPPLY CHAIN PROFILE

M.S. in Industrial Engineering and Manufacturing & Materials Planning Engineer with **5+ years of US and India plant experience** connecting production scheduling, inventory control, vendor pricing, and shop-floor continuous improvement. Bridges engineering, material planning, and shop-floor execution across US headquarters and India operations—including fulfilling dual **Project Manager and Planning Manager responsibilities during the October 2025 ASME U-Stamp Audit**. Combines 1.5 years of direct-to-President cost estimation and vendor coordination with hands-on automotive Lean/Kaizen execution (**+12% line efficiency, -15% setup time, 150+ BOMs**).

CORE COMPETENCIES & OPERATIONAL TOOLKIT

Materials Planning & Warehouse Operations: Material Requirements Planning (MRP), Inventory Allocation & Stock Integrity, FIFO Material Staging, Multi-Level BOM Development, Dispatch & Shipping Readiness, Packaging/Skid Coordination, Supplier & Logistics Follow-Up

Shop-Floor Execution & Lean Manufacturing: Shop-Floor Coordination & Operator Guidance, SQDCPME Alignment, 5S & Housekeeping, Kaizen, Value Stream Mapping (VSM), Six Sigma (DMAIC), Root-Cause Analysis (5-Why / Fishbone), Non-Value-Added (NVA) Waste Reduction, Synchronous Material Flow (SMF)

Audit Compliance & Cost Analysis: ASME U-Stamp Audit Execution (Project & Planning Scope), ISO / Quality Process Compliance, Variable & Investment Cost Comparison Studies, Vendor RFQ & Quotation Modeling, Cross-Functional Issue Escalation

Systems & Engineering Tools: Advanced Microsoft Excel (Custom Cost Estimation & Inventory Workbooks), ERP/MRP Material Workflows, R (Data Analysis), AutoCAD, SolidWorks, PTC Creo (DFM & Fabrication Drawings)

PROFESSIONAL EXPERIENCE

Savannah Tank & Equipment (Corporation & Pvt. Ltd.) — **Savannah, GA, USA & Ahmedabad, India • Jan 2023 – Present**

Mechanical Design Engineer — Planning & Plant Operations Scope — *Ahmedabad, India • Aug 2025 – Present*

Expanded operational scope across production planning, inventory allocation, audit readiness, and cross-functional shop-floor coordination in India.

- **ASME U-Stamp Audit Execution (Project & Planning Manager Scope):** Fulfilled both **Project Manager and Planning Manager** responsibilities during the **October 2025 ASME U-Stamp certification audit**; coordinated master routing schedules, material test report (MTR) traceability, quality control travelers, and physical stock verification across storekeepers, quality inspectors, welding leads, and procurement.
- **Inventory Allocation, Receiving & FIFO Staging:** Support plant inventory management and material allocation by reconciling physical stock against project requirements and master production schedules; coordinate with stores and procurement to maintain FIFO material staging, track work-in-progress (WIP), and prevent material-related line delays.
- **Shop-Floor Coordination, 5S & Bottleneck Resolution:** Participate in daily shop-floor reviews with fabrication supervisors, storekeepers, and quality personnel to support safety, 5S housekeeping, and delivery targets (SQDCPME); troubleshoot fit-up deviations, material shortages, and scheduling constraints to reduce rework and non-value-added (NVA) downtime.
- **Dispatch Readiness, Packaging & Logistics Alignment:** Coordinate finished equipment dispatch readiness with manufacturing and logistics teams by aligning structural skids, protective crating/packaging, lifting fixtures, and shipping documentation against customer release schedules.
- **Multi-Level BOM Governance & DFM Execution:** Lead mechanical design and BOM release execution for custom reactors, mixing tanks, and thermal energy storage vessels; standardize material take-offs (MTOs) and DFM drawings to ensure smooth material flow from stores to fabrication.

Mechanical Design Engineer — Cost Estimation & Vendor Operations Scope — *Savannah, GA, USA • Jan 2023 – Aug 2025*

- **Variable & Project Cost Estimation (1.5 Years Direct to President):** Independently managed project cost estimation and customer quotation modeling for **1.5 years** alongside engineering duties, reporting directly to the Company President; built custom Excel workbooks comparing raw material costs, supplier quotes, and fabrication labor hours across alternative build scenarios.
- **Supplier & Vendor RFQ Coordination:** Handled end-to-end vendor quotation coordination with established US component and material suppliers; engaged vendors daily to obtain pricing, clarify technical deliverables, track lead times, and align inbound material availability with production schedules.
- **High-Volume BOM & Manufacturing Execution (100+ Units):** Engineered and released complete manufacturing packages, multi-level BOMs, and material requisitions for **100+ custom equipment units**, optimizing material selection and structural designs using ASME/API standards, COMPRESS, AMETank, and localized FEA.
- **Shop-Floor Deviation Resolution & SOP Updates:** Worked directly with shop-floor fabricators and supervisors to resolve real-time design queries, fit-up issues, and dimensional deviations; updated technical documentation and standard work checklists to prevent recurring floor errors.

Gauri Engineering Company — Manufacturing Engineer (Automotive Components) — **Pune, India • Jul 2019 – Oct 2020**

- **Automotive Line Efficiency (+12%) & Setup Reduction (-15%):** Improved motorcycle handlebar production line efficiency by **12%** through shop-floor Kaizen events, cycle-time balancing, and NVA motion reduction, while cutting changeover and setup time by **15%** by designing and optimizing machining and assembly jigs/fixtures.
- **BOM Management (50+ BOMs) & Synchronous Material Flow:** Developed and maintained **50+ manufacturing BOMs**, monitored daily floor material consumption, and reorganized workstation staging and material movement to maintain smooth, synchronous flow from raw tube stock to dispatch.

Reliance Industries Limited — Maintenance Engineering Intern — **Surat, India • Jun 2018 – Jul 2018**

- **Root-Cause Analysis & Spare-Parts Coordination:** Supported plant equipment maintenance, root-cause analysis (RCA), preventive-maintenance scheduling, and MRO spare-parts inventory coordination across shop-floor maintenance teams.

EDUCATION

Master of Science in Industrial Engineering — Wichita State University — **Wichita, KS, USA • Jan 2021 – Dec 2022**

Relevant Coursework: Supply Chain & Logistics Management, Lean Manufacturing & Value Stream Mapping (VSM), Production Planning & Inventory Control, Six Sigma (DMAIC) Quality Engineering, Operations Research & Engineering Cost Analysis

Bachelor of Engineering in Mechanical Engineering — University of Pune — **Pune, India • Jul 2015 – May 2019**

Relevant Coursework: Manufacturing Processes & Production Engineering, Plant Layout & Material Handling, Industrial Engineering & Quality Control
